1,2-benzisothiazol-3(2H)-one.

Application Temperature

Application temperature +10°C to +32°C

EU Limit

This product contains a maximum of 30g/L VOC.
(CAT A/g) 50g/L (2007), 30g/L (2010).

Finishes

Finishes Available Clear Satin

Unit Size

5 Litre

Disposal

Dispose of contents and container in accordance with all local, regional, national and international regulations.

Application Guidelines

- Surface Preparation: Ensure surfaces are clean, contamination-free, fully dry and stable.
- Brush: For best results use a quality 3" synthetic type. Do not overload the brush or the primer will drip and run on vertical and overhead applications.
- Roller: Use a roller with a medium pile microfibre sleeve. Apply Pro Primer to walls from the bottom up to prevent product from running down the wall.
- Drying Time: Pro Primer is touch dry in 30 minutes.
- Note: It is critical that the primer is completely dry especially when installing self adhesive films. Any moisture still present

may cause adhesion problems. If installation has to be carried out on the same day of priming the drying out process can be increased by adding some gentle heat.

Health & Safety

- Silverbullet® Large Format Pro Primer
- Keep out of reach of children.
- Read label before use.
- If medical advice is needed, have product container or label at hand.
- May produce an allergic reaction.
- Safety data sheet available on request.
